1 [Cross-domain one-shot authorization using smart cards](#)

Richard Au, Mark Looi, Paul Ashley

 November 2000 **Proceedings of the 7th ACM conference on Computer and communications security**

Publisher: ACM Press

 Full text available: [pdf\(283.05 KB\)](#) Additional Information: [full citation](#), [references](#), [index terms](#)

Keywords: access control, authorization scheme, authorization server, one-shot authorization token, smart card

2 [Applications: A context-related authorization and access control method based on RBAC:](#)

Marc Wilikens, Simone Feriti, Alberto Sanna, Marcelo Masera

 June 2002 **Proceedings of the seventh ACM symposium on Access control models and technologies**

Publisher: ACM Press

 Full text available: [pdf\(260.70 KB\)](#) Additional Information: [full citation](#), [abstract](#), [references](#), [citations](#), [index terms](#)

This paper describes an application of authorization and access control based on the Role Based Access Control (RBAC) method and integrated in a comprehensive trust infrastructure of a health care application. The method is applied to a health care business process that involves multiple actors accessing data and resources needed for performing clinical and logistics tasks in the application. The notion of trust constituency is introduced as a concept for describing the context of authorisation. ...

Keywords: role based access control (RBAC), secure health care system, trust infrastructure

3 [Proposed NIST standard for role-based access control](#)

David F. Ferraiolo, Ravi Sandhu, Serban Gavrila, D. Richard Kuhn, Ramaswamy Chandramouli

 August 2001 **ACM Transactions on Information and System Security (TISSEC)**, Volume 4 Issue 3

Publisher: ACM Press

Full text available:  [pdf\(417.90 KB\)](#) Additional Information: [full citation](#), [abstract](#), [references](#), [citations](#), [index terms](#)

In this article we propose a standard for role-based access control (RBAC). Although RBAC models have received broad support as a generalized approach to access control, and are well recognized for their many advantages in performing large-scale authorization management, no single authoritative definition of RBAC exists today. This lack of a widely accepted model results in uncertainty and confusion about RBAC's utility and meaning. The standard proposed here seeks to resolve this situation by u ...

Keywords: Role-based access control, access control, authorization management, security, standards

4 [Access management for distributed systems: Peer-to-peer access control architecture using trusted computing technology](#)

 Ravi Sandhu, Xinwen Zhang

June 2005 **Proceedings of the tenth ACM symposium on Access control models and technologies**

Publisher: ACM Press

Full text available:  [pdf\(215.48 KB\)](#) Additional Information: [full citation](#), [abstract](#), [references](#), [index terms](#)

It has been recognized for some time that software alone does not provide an adequate foundation for building a high-assurance trusted platform. The emergence of industry-standard trusted computing technologies promises a revolution in this respect by providing roots of trust upon which secure applications can be developed. These technologies offer a particularly attractive platform for security in peer-to-peer environments. In this paper we propose a trusted computing architecture to enforce ac ...

Keywords: access control, policy enforcement, security architecture, trusted computing

5 [A model of OASIS role-based access control and its support for active security](#)

 Jean Bacon, Ken Moody, Walt Yao

November 2002 **ACM Transactions on Information and System Security (TISSEC)**, Volume 5 Issue 4

Publisher: ACM Press

Full text available:  [pdf\(352.06 KB\)](#) Additional Information: [full citation](#), [abstract](#), [references](#), [citations](#), [index terms](#)

OASIS is a role-based access control architecture for achieving secure interoperation of services in an open, distributed environment. The aim of OASIS is to allow autonomous management domains to specify their own access control policies and to interoperate subject to service level agreements (SLAs). Services define roles and implement formally specified policy to control role activation and service use; users must present the required credentials, in an appropriate context, in order to activate ...

Keywords: Certificates, OASIS, RBAC, distributed systems, policy, role-based access control, service-level agreements

6 [A taxonomy of computer program security flaws](#)

 Carl E. Landwehr, Alan R. Bull, John P. McDermott, William S. Choi

September 1994 **ACM Computing Surveys (CSUR)**, Volume 26 Issue 3

Publisher: ACM Press

Full text available:  [pdf\(3.81 MB\)](#) Additional Information: [full citation](#), [abstract](#), [references](#), [citations](#), [index terms](#)

[terms](#), [review](#)

An organized record of actual flaws can be useful to computer system designers, programmers, analysts, administrators, and users. This survey provides a taxonomy for computer program security flaws, with an Appendix that documents 50 actual security flaws. These flaws have all been described previously in the open literature, but in widely separated places. For those new to the field of computer security, they provide a good introduction to the characteristics of security flaws and how they ...

Keywords: error/defect classification, security flaw, taxonomy

7 Access control: An access control framework for business processes for web services

Hristo Koshutanski, Fabio Massacci

October 2003 **Proceedings of the 2003 ACM workshop on XML security**

Publisher: ACM Press

Full text available: [pdf\(269.56 KB\)](#) Additional Information: [full citation](#), [abstract](#), [references](#), [index terms](#), [review](#)

Business Processes for Web Services are the new paradigm for the lightweight integration of business from different enterprises. Whereas the security and access control policies for basic web services and distributed systems are well studied and almost standardized, there is not yet a comprehensive proposal for an access control architecture for business processes. The major issue is that a business process describe complex services that cross organizational boundaries and are provided by entitie ...

8 A composable framework for secure multi-modal access to internet services from Post-PC devices

Steven J. Ross, Jason L. Hill, Michael Y. Chen, Anthony D. Joseph, David E. Culler, Eric A. Brewer

October 2002 **Mobile Networks and Applications**, Volume 7 Issue 5

Publisher: Kluwer Academic Publishers

Full text available: [pdf\(340.33 KB\)](#) Additional Information: [full citation](#), [abstract](#), [references](#), [index terms](#), [review](#)

The Post-PC revolution is bringing information access to a wide range of devices beyond the desktop, such as public kiosks, and mobile devices like cellular telephones, PDAs, and voice based vehicle telematics. However, existing deployed Internet services are geared toward the secure rich interface of private desktop computers. We propose the use of an infrastructure-based secure proxy architecture to bridge the gap between the capabilities of Post-PC devices and the requirements of Internet ser ...

Keywords: internet, middleware, post-PC, security, transcoding

9 SIGCOMM 1- Software-hardware interactions: An experimental application of cryptography to a remotely accessed data system

J. L. Smith, W. A. Notz, P. R. Osseck

August 1972 **Proceedings of the ACM annual conference - Volume 1**

Publisher: ACM Press

Full text available: [pdf\(1.46 MB\)](#) Additional Information: [full citation](#), [abstract](#), [references](#), [citations](#)

An experimental system has been developed which illustrates ways cryptography can be applied to certain data-security problems concerning remotely accessible data files. These problems are in two main classes: security of data while in transit over communications lines and security of data while in storage. The system makes use of a combination of software and special hardware to provide enciphering and deciphering of messages between a terminal and a data processor. Not only is the content of m ...

Keywords: communication security, cryptography, data communications, data security, data-base protection, file protection, teleprocessing, terminals authentication, time-shared systems

10 On-line e-wallet system with decentralized credential keepers

Stig Frode Mjøl̂snes, Chunming Rong

February 2003 **Mobile Networks and Applications**, Volume 8 Issue 1

Publisher: Kluwer Academic Publishers

Full text available:  [pdf\(240.23 KB\)](#) Additional Information: [full citation](#), [abstract](#), [references](#), [index terms](#)

We propose a generalization of the architecture of an electronic wallet, as first developed in the seminal European research project CAFE. With this model you can leave most of the content of your electronic wallet at the security of your residential electronic keeper, while roaming with your favorite mobile terminals. Emerging mobile handsets with both short range Bluetooth and cellular GPRS communications provide a sufficient communication platform for this electronic wallet architecture. Howe ...

Keywords: digital credentials, e-wallet architecture, mobile commerce, payment protocols, privacy

11 A fine-grained access control system for XML documents

 Ernesto Damiani, Sabrina De Capitani di Vimercati, Stefano Paraboschi, Pierangela Samarati

May 2002 **ACM Transactions on Information and System Security (TISSEC)**, Volume 5 Issue 2

Publisher: ACM Press

Full text available:  [pdf\(330.60 KB\)](#) Additional Information: [full citation](#), [abstract](#), [references](#), [citations](#), [index terms](#)

Web-based applications greatly increase information availability and ease of access, which is optimal for public information. The distribution and sharing of information via the Web that must be accessed in a selective way, such as electronic commerce transactions, require the definition and enforcement of security controls, ensuring that information will be accessible only to authorized entities. Different approaches have been proposed that address the problem of protecting information in a Web ...

Keywords: Access control, World Wide Web, XML documents, authorizations specification and enforcement

12 Unlinkable serial transactions: protocols and applications

 Stuart G. Stubblebine, Paul F. Syverson, David M. Goldschlag

November 1999 **ACM Transactions on Information and System Security (TISSEC)**, Volume 2 Issue 4

Publisher: ACM Press

Full text available:  [pdf\(184.87 KB\)](#) Additional Information: [full citation](#), [abstract](#), [references](#), [citations](#), [index terms](#), [review](#)

We present a protocol for unlinkable serial transactions suitable for a variety of network-based subscription services. It is the first protocol to use cryptographic blinding to enable

subscription services. The protocol prevents the service from tracking the behavior of its customers, while protecting the service vendor from abuse due to simultaneous or cloned use by a single subscriber. Our basic protocol structure and recovery protocol are robust against failure in protocol termination. ...

Keywords: anonymity, blinding, cryptographic protocols, unlinkable serial transactions

13 Network layer access control for context-aware IPv6 applications

Adrian Friday, Maomao Wu, Joe Finney, Stefan Schmid, Keith Cheverst, Nigel Davies

July 2003 **Wireless Networks**, Volume 9 Issue 4

Publisher: Kluwer Academic Publishers

Full text available:  [pdf\(3.57 MB\)](#) Additional Information: [full citation](#), [abstract](#), [references](#), [index terms](#)

As part of the Lancaster GUIDE II project, we have developed a novel wireless access point protocol designed to support the development of next generation mobile context-aware applications in our local environs. Once deployed, this architecture will allow ordinary citizens secure, accountable and convenient access to a set of tailored applications including location, multimedia and context based services, and the public Internet. Our architecture utilises packet marking and network level packet ...

Keywords: authentication, mobile IPv6, public access point, security, wireless Internet

14 Content-triggered trust negotiation

 Adam Hess, Jason Holt, Jared Jacobson, Kent E. Seamons

August 2004 **ACM Transactions on Information and System Security (TISSEC)**, Volume 7 Issue 3

Publisher: ACM Press

Full text available:  [pdf\(815.36 KB\)](#) Additional Information: [full citation](#), [abstract](#), [references](#), [index terms](#)

The focus of access control in client/server environments is on protecting sensitive server resources by determining whether or not a client is authorized to access those resources. The set of resources is usually static, and an access control policy associated with each resource specifies who is authorized to access the resource. In this article, we turn the traditional client/server access control model on its head and address how to protect the sensitive content that clients disclose to and r ...

Keywords: Trust negotiation, access control, authentication, credentials

15 Access control with IBM Tivoli access manager

 Günter Karjoth

May 2003 **ACM Transactions on Information and System Security (TISSEC)**, Volume 6 Issue 2

Publisher: ACM Press

Full text available:  [pdf\(367.07 KB\)](#) Additional Information: [full citation](#), [abstract](#), [references](#), [citations](#), [index terms](#)

Web presence has become a key consideration for the majority of companies and other organizations. Besides being an essential information delivery tool, the Web is increasingly being regarded as an extension of the organization itself, directly integrated with its operating processes. As this transformation takes place, security grows in importance. IBM Tivoli Access Manager offers a shared infrastructure for authentication and access management, technologies that have begun to emerge in the com ...

Keywords: Access control, WWW security, Web servers, authorization management

16 Delegation logic: A logic-based approach to distributed authorization

 Ninghui Li, Benjamin N. Grosof, Joan Feigenbaum
February 2003 **ACM Transactions on Information and System Security (TISSEC)**, Volume 6 Issue 1
Publisher: ACM Press

Full text available:  pdf(316.24 KB) Additional Information: [full citation](#), [abstract](#), [references](#), [citations](#), [index terms](#)

We address the problem of authorization in large-scale, open, distributed systems. Authorization decisions are needed in electronic commerce, mobile-code execution, remote resource sharing, privacy protection, and many other applications. We adopt the trust-management approach, in which "authorization" is viewed as a "*proof-of-compliance*" problem: Does a set of credentials prove that a request complies with a policy? We develop a logic-based language, called *Delegation Logic* (DL), t ...

Keywords: Access control, Delegation Logic, distributed system security, logic programs, trust management

17 Columns: Risks to the public in computers and related systems

 Peter G. Neumann
January 2001 **ACM SIGSOFT Software Engineering Notes**, Volume 26 Issue 1
Publisher: ACM Press

Full text available:  pdf(3.24 MB) Additional Information: [full citation](#)

18 A secure infrastructure for service discovery and access in pervasive computing

Jeffrey Undercoffer, Filip Perich, Andrej Cedilnik, Lalana Kagal, Anupam Joshi
April 2003 **Mobile Networks and Applications**, Volume 8 Issue 2
Publisher: Kluwer Academic Publishers

Full text available:  pdf(308.34 KB) Additional Information: [full citation](#), [abstract](#), [references](#), [citations](#), [index terms](#)

Security is paramount to the success of pervasive computing environments. The system presented in this paper provides a communications and security infrastructure that goes far in advancing the goal of anywhere-anytime computing. Our work securely enables clients to access and utilize services in heterogeneous networks. We provide a service registration and discovery mechanism implemented through a hierarchy of service management. The system is built upon a simplified Public Key Infrastructure t ...

Keywords: distributed services, extensible markup language, pervasive computing, security, smartcards

19 Trust but verify: authorization for web services

 Christian Skalka, X. Sean Wang
October 2004 **Proceedings of the 2004 workshop on Secure web service SWS '04**
Publisher: ACM Press

Full text available:  pdf(375.55 KB) Additional Information: [full citation](#), [abstract](#), [references](#), [index terms](#)

Through web service technology, distributed applications can be built in a flexible manner, bringing tremendous power to applications on the web. However, this flexibility poses significant challenges to security. In particular, an end user (be it human or machine) may access a web service directly, or through a number of intermediaries, while these intermediaries may be formed on the fly for a particular task. Traditional access control

for distributed systems is not flexible and efficient enou ...

Keywords: access control logic, distributed authorization, web services

20 Securing wireless applications: ESCORT: a decentralized and localized access control system for mobile wireless access to secured domains

Jiejun Kong, Shirshanka Das, Edward Tsai, Mario Gerla

September 2003 **Proceedings of the 2003 ACM workshop on Wireless security**

Publisher: ACM Press

Full text available: pdf(401.72 KB) Additional Information: [full citation](#), [abstract](#), [references](#), [index terms](#)

In this work we design and implement ESCORT, a *backward compatible, efficient, and secure* access control system, to facilitate mobile wireless access to secured wireless LANs. In mobile environments, a mobile guest may frequently roam into foreign domains while demanding critical network services. ESCORT provides instant yet secure access to the mobile guest based on the concept of "escort", which refers to a special network object with four distinct properties: (1) T ...

- ☐ 4. **Computer-access authentication with neural network based keystroke identification**
Daw-Tung Lin;
[Neural Networks, 1997., International Conference on](#)
Volume 1, 9-12 June 1997 Page(s):174 - 178 vol.1
Digital Object Identifier 10.1109/ICNN.1997.611659
[AbstractPlus](#) | Full Text: [PDF](#)(364 KB) [IEEE CNF](#)
[Rights and Permissions](#)
- ☐ 5. **Adaptable and configurable systems to enable disabled people to access systems**
Blenkhorn, P.;

[Special Needs and the Interface, IEE Colloquium on](#)
13 Jan 1993 Page(s):311 - 312

[AbstractPlus](#) | [Full Text: PDF\(88 KB\)](#) [IEEE CNF](#)

- ☐ **6. The Camera Mouse: visual tracking of body features to provide computer people with severe disabilities**
Betke, M.; Gips, J.; Fleming, P.;
[Neural Systems and Rehabilitation Engineering, IEEE Transactions on \[see also Rehabilitation Engineering\]](#)
Volume 10, Issue 1, March 2002 Page(s):1 - 10
Digital Object Identifier 10.1109/TNSRE.2002.1021581
[AbstractPlus](#) | [References](#) | [Full Text: PDF\(319 KB\)](#) [IEEE JNL](#)
[Rights and Permissions](#)

- ☐ **7. Solving Computer Access Needs - A Local Area Network Approach**
Nall, K.; Clayton, D.;
[OCEANS](#)
Volume 16, Sep 1984 Page(s):105 - 108
[AbstractPlus](#) | [Full Text: PDF\(312 KB\)](#) [IEEE CNF](#)
[Rights and Permissions](#)

- ☐ **8. Computer-access security systems using keystroke dynamics**
Bleha, S.; Slivinsky, C.; Hussien, B.;
[Pattern Analysis and Machine Intelligence, IEEE Transactions on](#)
Volume 12, Issue 12, Dec. 1990 Page(s):1217 - 1222
Digital Object Identifier 10.1109/34.62613
[AbstractPlus](#) | [Full Text: PDF\(560 KB\)](#) [IEEE JNL](#)
[Rights and Permissions](#)

- ☐ **9. An online neural network system for computer access security**
Obaidat, M.S.; Macchiarolo, D.T.;
[Industrial Electronics, IEEE Transactions on](#)
Volume 40, Issue 2, April 1993 Page(s):235 - 242
Digital Object Identifier 10.1109/41.222645
[AbstractPlus](#) | [Full Text: PDF\(628 KB\)](#) [IEEE JNL](#)
[Rights and Permissions](#)

- ☐ **10. Optimal digital filtering for tremor suppression**
Gonzalez, J.G.; Heredia, E.A.; Rahman, T.; Barner, K.E.; Arce, G.R.;
[Biomedical Engineering, IEEE Transactions on](#)
Volume 47, Issue 5, May 2000 Page(s):664 - 673
Digital Object Identifier 10.1109/10.841338
[AbstractPlus](#) | [References](#) | [Full Text: PDF\(224 KB\)](#) [IEEE JNL](#)
[Rights and Permissions](#)

- ☐ **11. Adaptive software for head-operated computer controls**
LoPresti, E.F.; Brienza, D.M.;
[Neural Systems and Rehabilitation Engineering, IEEE Transactions on \[see also Rehabilitation Engineering\]](#)
Volume 12, Issue 1, March 2004 Page(s):102 - 111
Digital Object Identifier 10.1109/TNSRE.2003.822762
[AbstractPlus](#) | [References](#) | [Full Text: PDF\(368 KB\)](#) [IEEE JNL](#)
[Rights and Permissions](#)

- ☐ **12. A wireless emulation management system for learning Mandarin phonetic Morse code**
Cheng-Hong Yang; Li-Yeh Chuang; Shyang-Lung Lin; Chi-Min Wang;
[Advanced Learning Technologies, 2005. ICALT 2005. Fifth IEEE International](#)
5-8 July 2005 Page(s):106 - 107

Digital Object Identifier 10.1109/ICALT.2005.35

[AbstractPlus](#) | Full Text: [PDF\(61 KB\)](#) [IEEE CNF](#)
[Rights and Permissions](#)

- ☐ **13. A text graphics character CAPTCHA for password authentication**
Dailey, M.; Namprempre, C.;
[TENCON 2004. 2004 IEEE Region 10 Conference](#)
Volume B, 21-24 Nov. 2004 Page(s):45 - 48 Vol. 2
Digital Object Identifier 10.1109/TENCON.2004.1414527
[AbstractPlus](#) | Full Text: [PDF\(1915 KB\)](#) [IEEE CNF](#)
[Rights and Permissions](#)

- ☐ **14. Exploring edge-based input techniques for handheld text entry**
Wobbrock, J.O.; Myers, B.A.; Hudson, S.E.;
[Distributed Computing Systems Workshops, 2003. Proceedings. 23rd International](#)
[on](#)
19-22 May 2003 Page(s):280 - 282
Digital Object Identifier 10.1109/ICDCSW.2003.1203567
[AbstractPlus](#) | Full Text: [PDF\(279 KB\)](#) [IEEE CNF](#)
[Rights and Permissions](#)

- ☐ **15. Feature extraction in development of brain-computer interface: a case study**
Polak, M.; Kostov, A.;
[Engineering in Medicine and Biology Society, 1998. Proceedings of the 20th Annual](#)
[International Conference of the IEEE](#)
Volume 4, 29 Oct.-1 Nov. 1998 Page(s):2058 - 2061 vol.4
Digital Object Identifier 10.1109/IEMBS.1998.747011

[Rights and Permissions](#)

- ☐ **16. Supports for students with disability through technology-challenge at California State University, Northridge**
Kohama, A.;
[TRON Project International Symposium, 1996. TEPS '96](#)
4-7 Dec. 1996 Page(s):121 - 122
Digital Object Identifier 10.1109/TRON.1996.566201
[AbstractPlus](#) | Full Text: [PDF\(148 KB\)](#) [IEEE CNF](#)
[Rights and Permissions](#)

- ☐ **17. Programs of the Center on Disabilities at California State University, Northridge**
Murphy, H.J.;
[TRON Project International Symposium, 1996. TEPS '96](#)
4-7 Dec. 1996 Page(s):118 - 120
Digital Object Identifier 10.1109/TRON.1996.566200
[AbstractPlus](#) | Full Text: [PDF\(228 KB\)](#) [IEEE CNF](#)
[Rights and Permissions](#)

- ☐ **18. Physical access to computers: can your computer be trusted?**
Fabian, W.;
[Security Technology, 1995. Proceedings. Institute of Electrical and Electronics Engineers](#)
[Annual 1995 International Carnahan Conference on](#)
18-20 Oct. 1995 Page(s):244 - 251
Digital Object Identifier 10.1109/CCST.1995.524920
[AbstractPlus](#) | Full Text: [PDF\(588 KB\)](#) [IEEE CNF](#)
[Rights and Permissions](#)

- ☐ **19. Single switch input for C-64 computer**
Gunn, R.D.;
[Computing Applications to Assist Persons with Disabilities, 1992. Proceedings.](#)

[Hopkins National Search for](#)
1-5 Feb. 1992 Page(s):95 - 96
Digital Object Identifier 10.1109/CAAPWD.1992.217435
[AbstractPlus](#) | Full Text: [PDF](#)(128 KB) [IEEE CNF](#)
[Rights and Permissions](#)

- ☐ **20. Integrating physical and computer access control systems**
Smith, J.M.; Charland, R.;
[Security Technology, 1994. Proceedings. Institute of Electrical and Electronics](#)
[Annual 1994 International Carnahan Conference on](#)
12-14 Oct. 1994 Page(s):176 - 179
